

# This or This?

Unightly algae and potential liability.

Sparkling clean, great curb appeal!

Pictured are two intersections of the same street about 200 feet apart (pictures taken same day)

## All it takes is some work with...

or

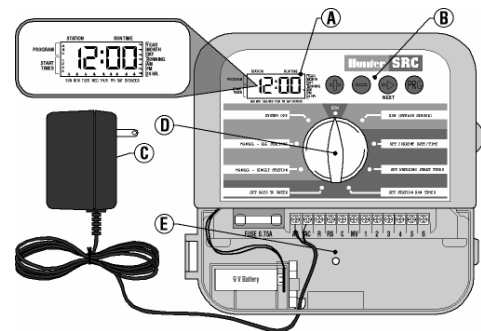

The great thing about the key to algae free gutters is you already have everything you need.

Simply program all timers to not water on sweep day and the day before.

Water all you want the other days, even create the next great flood.

Upstream neighbors having a hard time? Offer to program it for them. Or find the neighborhood "computer kid" and pay him \$2 per timer. It sure beats mowing the lawn for pocket money.
